Please provide a description of the methods used to solicit community input on community needs (attach additional pages if necessary): Mid-State uses a variety of research and trusted data sources to collect and report various demographic and historical data for our region including our own Electronic Health Record. During the period of March through July, 2014, an assessment of community health needs in the communities of the Central New Hampshire Region was conducted by the Central New Hampshire Health Partnership. Methods employed in the assessment included a series of community discussion groups convened and moderated by members of the Central New Hampshire Health Partnership and a review of available population demographics and health status indicators to update the community health needs assessment completed in 2011. For more detail, please refer to the complete 2014 Central New Hampshire Health Partnership Community Health Needs Assessment available online on the Mid-State Health Center website: www.midstatehealth.org
