Section 2: MISSION & COMMUNITY SERVED

Mission Statement: Cedarcrest Center enriches the lives of children with complex medical and developmental needs, supports their families, and collaborates with other community providers to build a continuum of care.

Has the Mission Statement been reaffirmed in the past year (*RSA 7:32e-I*)? Yes

Please describe the community served by the health care charitable trust. "Community" may be defined as a geographic service area and/or a population segment.

Service Area (Identify Towns or Region describing the trust's primary service area):
All of New Hampshire

Service Population (Describe demographic or other characteristics if the trust primarily serves a population other than the general population):

Cedarcrest Center provides specialized medical care, special education, and physical, occupational, and speech therapy services for children with complex medical and developmental needs. The Center also offers specialty care for children with significant respiratory compromise. The only Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) licensed in the state of New Hampshire, the Center is also certified by the Division of Children, Youth, and Families. Cedarcrest Center is New Hampshire's principal resource for post-acute medical care for children and the only licensed provider of such care for children younger than three years of age. Cedarcrest School is approved by the New Hampshire Department of Education as a special education provider for both day and residential students.

Cedarcrest Center has the capacity to serve 26 residents ranging from infants to young adults, including those who require ventilator support, IV therapy or other high-tech medical care. Increasing numbers of children were born and survive with medical complexity, and all have a variety of high-risk medical conditions and multiple disabilities, including respiratory compromise, seizure disorders, neurological disorders, cerebral palsy, non-accidental traumatic brain injury and similar diagnoses. Some are in need of care as they transition from hospital toward home; others need specialty evaluations or post-operative care; and still others require long-term intensive nursing support. The Center continues to offer short-term stays for children who are being cared for at home, but whose families have need for an additional care option when there is an interruption in community-based supports or a need for respite support arises. During the past fiscal year Cedarcrest Center provided inpatient care for 42 different children.

Cedarcrest School is approved for a total of 20 students. In addition to its program for residential students, Cedarcrest School offers day education services to students from surrounding communities who need a special education program with integrated therapy services and nursing support. Four students took advantage of this resource this past year. Five residential students go out to community school programs.

Cedarcrest Center strongly supports a number of clinical education programs. The Center is the host site for clinical rotations for nursing students at three colleges: River Valley Community College, Vermont Technical College, and Keene State College. Forty-eight (48) student nurses completed rotations last year.

The Center regularly hosts visits for students in Nurse Assistant training programs offered by other agencies and provides CPR training for staff from other nursing facilities as well. To address current workforce shortage needs, the Center partnered with Langdon Place of Keene and LNA Health Careers to offer on-site LNA training.

The Center periodically hosts students from area colleges who come to the Center for a variety of learning experiences; this past year included a number of observations by medical, therapy and special education students.

Cedarcrest Center administrators and clinical staff are active participants in many professional and community organizations, with staff members this past year also sharing their expertise in the areas of brain injury, adaptive recreation, physical therapy, transition planning, and not-for-profit development.

The Center continues to partner with other organizations to address identified needs for services, and is active around increasing care options for older teens with complex medical and developmental needs and expanding respite services for families of children with developmental disabilities or chronic health conditions, including those in need of high-tech support. This past year, in collaboration with Monadnock Developmental Services, the Center hosted a "transition fair" for high school students and their families.

In response to another community need, Cedarcrest Center has continued to host child development clinics for Monadnock Region families in collaboration with Special Medical Services in Manchester. We anticipate that these clinics will continue for the foreseeable future.

This past year, the Center has been engaged with a number of regional providers to respond to the impact the nationwide shortage of nursing professionals is having in the Monadnock region and around the state. The group is scheduling a number of legislative information sessions in the near future.

Section 3: COMMUNITY NEEDS ASSESSMENT

In what year was the last community needs assessment conducted to assist in determining the activities to be included in the community benefit plan?

Please provide a description of the methods used to solicit community input on community needs (attach additional pages if necessary): From mid-January to mid-February 2016, Cedarcrest Center conducted an online survey of needs of more than 375 families of children with complex medical needs statewide, as well as a survey of trends and observed needs among more than 240 medical, education and human services providers statewide who serve children with medical complexities. In addition, in the development of our 2017-2020 strategic plan this past spring, staff convened six listening sessions around the state: one each with providers at Dartmouth-Hitchcock Medical Center and Elliot Health System Pediatrics, and four others with parents, medical providers, human services and special education professionals, representatives of managed-care companies, Special Medical Services, DCYF, public officials, and policy-makers in the Offices of Long Term Care and Medicaid. Administrative staff also consulted with members of our Advisory Council and Board of Trustees, the NH Health Care Association and the Pediatric Complex Care Association.
