Re: Data Security Breach Notification

Dear Attorney General Ayotte:

We are writing to notify you of a recently discovered security incident at Antioch University, located in Yellow Springs, Ohio.

On February 13, 2008, Antioch University confirmed, to the best of its knowledge, that the security of the Antioch University computer system was breached on June 9, 2007, June 10, 2007, and October 11, 2007. The intruder potentially had unauthorized and undetected access to the system from the time of the breach until detection of the breach and securing of the system.

Upon accessing Antioch's computer network, the unauthorized user would have had access to files containing Social Security numbers, names, and academic records for students and former students, payroll records of Antioch employees and former employees, and names and Social Security numbers for student applicants. There is no conclusive evidence that the attacker acquired the personal data, but it is impossible to conclude for certain that the hacker did not acquire the data.

Of the persons who were or will be potentially affected by the breach, 4,334 are residents of New Hampshire. Antioch has prepared notices to all potentially affected persons and intends to mail the notices on March 29, 2008. A copy of the notice to be sent to residents of New Hampshire is enclosed.

Sincerely,

A handwritten signature in blue ink, appearing to read "Thomas A. Faecke".

Thomas A. Faecke
CFO, Antioch University

Enclosure

March 29, 2008

City, State ZIP

Dear Recipient:

This letter is to inform you that on February 13, 2008, a security incident occurred on one of Antioch University's computer systems. The University responded aggressively and immediately contacted forensic software investigators to examine its computer system.

After analyzing Antioch's computer system, the investigators determined that an unauthorized intruder breached Antioch's computer system on three different occasions: June 9, 2007, June 10, 2007, and October 11, 2007. The system contains files with Social Security numbers, names, academic records for students and former students, and payroll records regarding Antioch's employees and former employees. It also contains names and Social Security numbers for student applicants.

We are not aware of a single report of identity theft as a result of the intruder's actions. No conclusive evidence has been found that the intruder actually acquired, viewed, copied, or otherwise misappropriated any of your personal information. Nonetheless, we are continuing to analyze all available evidence to determine the extent of the intrusion. Based on what we know regarding the facts surrounding the intrusion, we believe it is unlikely your information has been or will be misused. However, the University does not seek to minimize the concerns raised by this intrusion.

Improvements to our system are being made but it is constant vigilance and a sense of caution that are necessary in keeping the system we develop safe. We will continue to reevaluate, identify, and remove potential vulnerabilities as we make improvements to our security system.

The University is working with appropriate federal and state law enforcement agencies to apprehend the responsible party and to determine if any personal information was stolen. The University will aggressively pursue those responsible for the breach. Additionally, we have contacted the three major consumer credit reporting agencies to inform them of this incident.

Antioch University takes the security and privacy of its employees, students, and applicants seriously and deeply regrets that this incident has occurred. Because of this, we are taking the following precautions to assist you in protecting your private information.

A Toll Free Hotline at 1-866-905-2288 has been set up to assist you with answers to any questions or concerns regarding the data security intrusion. The Toll Free Hotline is available from 9 a.m. to 5 p.m. EDT, April 1 through May 30, 2008. If you call after

business hours or find it necessary to leave a message, Antioch University will attempt to return your call within two business days.

- The University has initiated a Web site that contains useful information for anyone concerned about the protection of his or her personal information, and we encourage you to visit the site at www.antioch.edu/itsecurity and to use the information there.

We encourage you to remain vigilant in monitoring your credit. To help protect against fraud and identity theft, please take the following steps:

Review your bank, credit card, and debit card account statements regularly and immediately report any suspicious activity to your bank or financial institution. Monitor your credit reports with the major consumer credit reporting agencies.

Equifax

- For further information regarding steps you can take to protect yourself against identity theft, please visit the Federal Trade Commission's website at www.ftc.gov/idtheft.

If you suspect that you are a victim of identity theft immediately contact local law enforcement, your state's Office of Attorney General, and the Federal Trade Commission (1-877-ID-THEFT or 1-877-438-4338).

Again, Antioch deeply regrets any inconvenience this incident may have caused.

Sincerely

William Marshall
Chief Information Officer
