Notice to Attorney General for the State of New Hampshire

Office of the Attorney General
33 Capitol Street
Concord, NH 03301

Via US Mail

To whom it may concern:

Pursuant to N.H. Rev. Stat. § 359-C:20.I(b) and on behalf of our client Atlantic Automotive Corp. d/b/a MileOne, Inc., we are notifying you of a recent security incident that one of MileOne's third party vendors experienced, and that may have compromised some of MileOne's customers' personal information, including information for 21 New Hampshire residents.

TradeMotion, which hosts and operates the <http://getbmwparts.com> and <http://subarupartsdepot.com> websites on MileOne's behalf (including all payment functions), believes that criminal hackers were able to unlawfully access certain credit card information as it was being entered into their system during the period from March 5, 2014 to May 17, 2014. TradeMotion believes the information that was accessed may have included the consumers' name, address, email address and credit card number, but is continuing to investigate which specific consumers were affected and what specific information was accessed. TradeMotion has contacted the FBI regarding this incident.

We understand from TradeMotion that it has removed the software used by the hackers to access this information, it has replaced the affected server, has hired TrustWave for third party monitoring and auditing and is monitoring its systems for any ongoing activity. It is also conducting penetration testing and is monitoring its systems for any additional unauthorized activity. MileOne is working closely with TradeMotion to continue to monitor the situation.

We are notifying all affected consumers of this incident, including all affected New Hampshire residents. We expect to send the notice in writing by US Mail on or about June 16, 2014.

Sincerely,

A handwritten signature in black ink that reads 'Meghan Musselman'.

Meghan Musselman
